

# CLIMATE

- Temperature

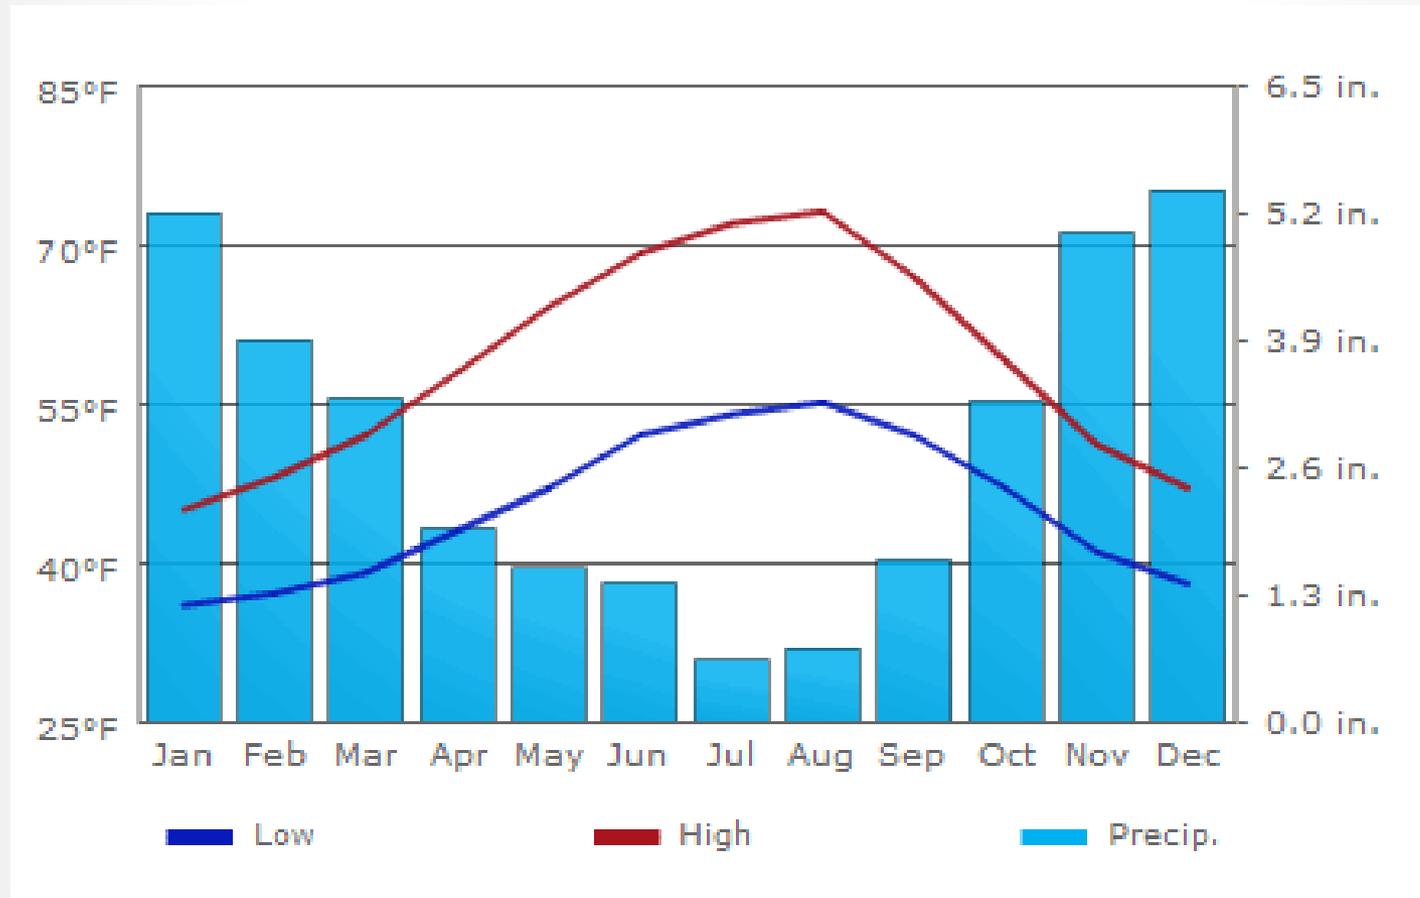

- In the summer, seldom get too hot, average temperature hover around a pleasant 75, but do get weeklong high 80s and low 90s;
- In the winter, never get too cold, Seattle may see a handful of snow days per year but the average low is around 37;
- In the spring and fall, the temperature is similar somewhere between 40s to 60s

- Precipitation

- Average annual precipitation is around 37in;
- On average, it rains in Seattle at least 50% of the time, with the heaviest rain peroids between January and May and between October and December, the dryest and warmest months are June, July and August;
- The rain Seattle is famous for ranges from a misty drizzle to full downpours, but misty drizzle is more common in frequency, local people get used to it and usually not using umbrellas.

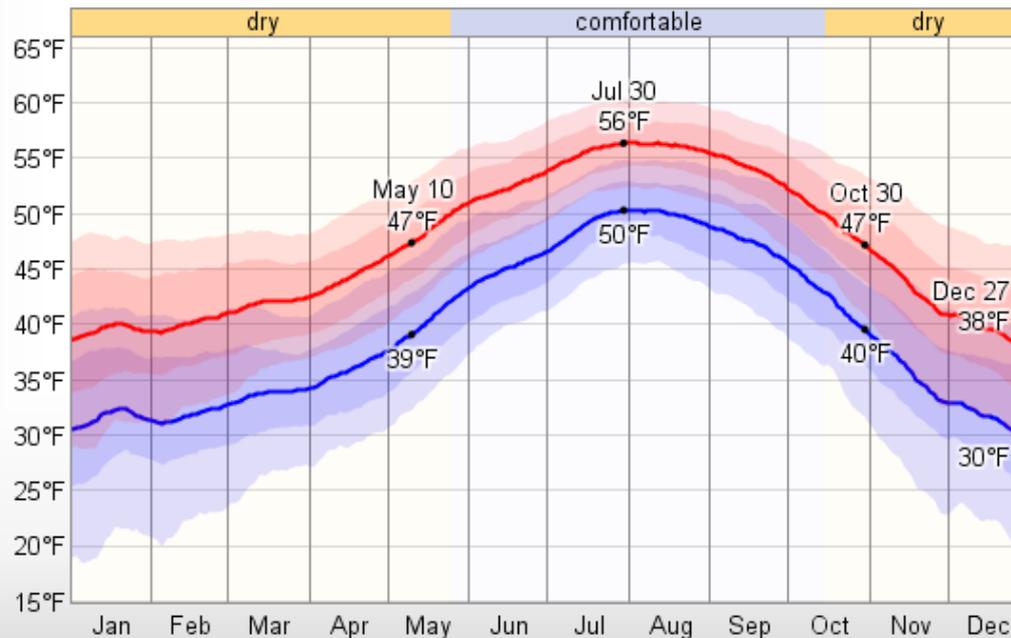

# TEMPERATURE & PRECIPITATION CHART

Seattle has a milder climate than many other parts of the world, less extreme variations in temperature, and a higher number of cloudy days with misty and damp weather

# • Humidity/Dew Point

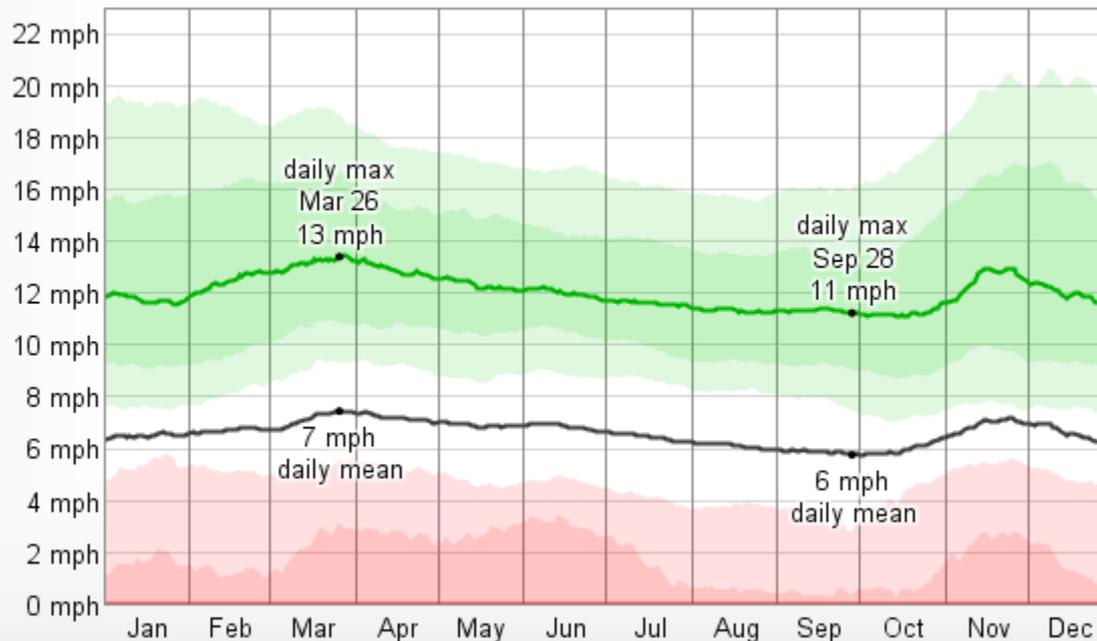

- Dew point is often a better measure of how comfortable a person will find the weather than relative humidity because it more directly relates to whether perspiration will evaporate from the skin, thereby cooling the body. Lower dew points feel drier and higher dew points feel more humid.
- Over the course of a year, the dew point typically varies from 30° F (dry) to 56° F (comfortable) and is rarely below 18° F (dry) or above 60° F (comfortable).
- The time of the year between May 25 and October 15 is the most comfortable, with dew points that are neither too dry nor too muggy

# • Wind

## ○ Wind Speed

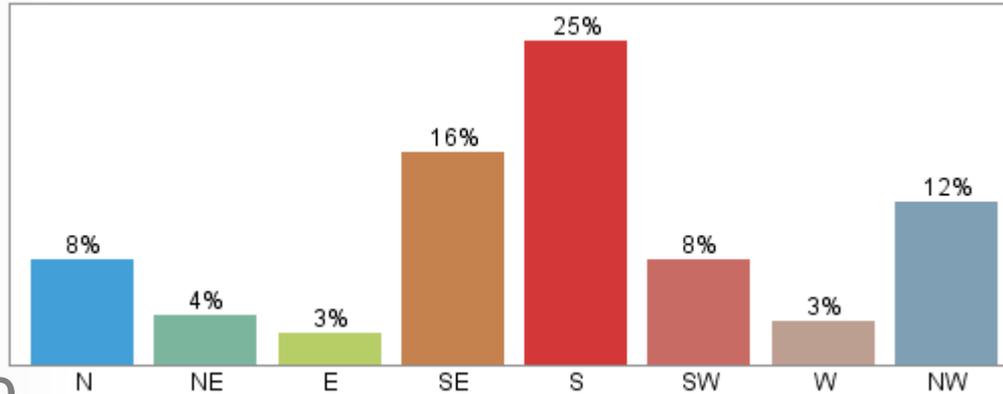

- Over the course of the year typical wind speeds vary from 0 mph to 13 mph (calm to moderate breeze), rarely exceeding 21 mph (fresh breeze).
- The highest average wind speed of 7 mph (light breeze) occurs around March 26, at which time the average daily maximum wind speed is 13 mph (moderate breeze).
- The lowest average wind speed of 6 mph (light breeze) occurs around September 28, at which time the average daily maximum wind speed is 11 mph (gentle breeze).

# • Wind

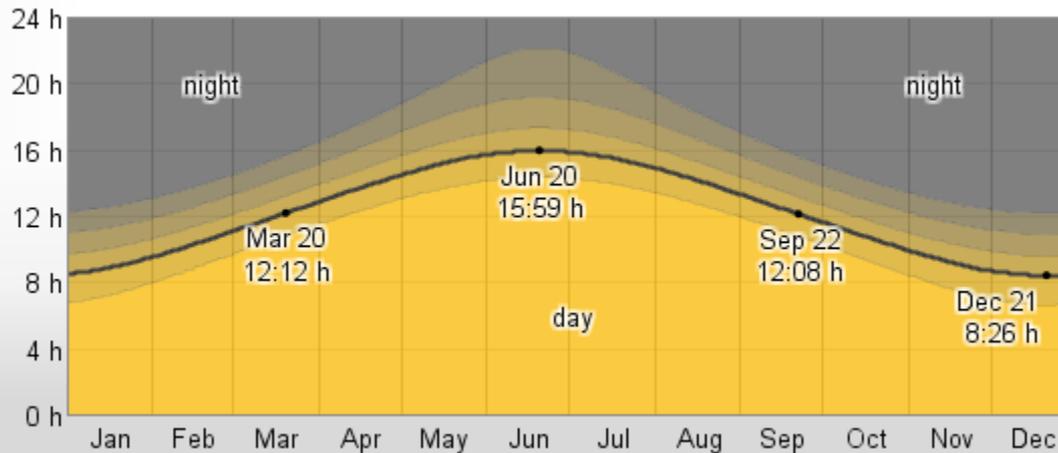

## ○ Wind Direction

- The wind is most often out of the south (25% of the time), south east (16% of the time), and north west (12% of the time). The wind is least often out of the east (3% of the time), west (3% of the time), and north east (4% of the time).

# • Sun

- The length of the day varies significantly over the course of the year. The shortest day is December 21 with 8:26 hours of daylight; the longest day is June 20 with 15:59 hours of daylight.

# • Clouds

- The median cloud cover ranges from 58% (partly cloudy) to 99% (overcast). The sky is cloudiest on January 1 and clearest on August 14. The clearer part of the year begins around June 27. The cloudier part of the year begins around September 29.
